

CWHBA STALLION REGISTRATION/ENTRY STATISTICS TO 2005.

This table is for the interest of breeders. It gives the numbers of CWHBA registered or entered offspring by current or recently active CWHBA entered stallions. Listed are those stallions with 2 or more registered/entered CWHBA offspring. These statistics include that work processed up to January 1, 2006, but do not necessarily include all registrations and/or mare entries and inspections from 2005, many of which were still being processed. Complete list in PDF on the web site.

Some stallions show offspring registered in the Auxiliary Book - daughters which have not been presented for inspection, but have offspring registered, revert to 'A' Book until inspected.

Included also is the number and type of inspection premiums awarded to each stallion's daughters; this does not include progeny evaluations of geldings nor does it include riding test and

material class premiums at this time.

Note: Numbers do not represent totals of ALL foals by any stallion as CWHBA has entered stallions whose offspring are, or have been, registered with other Registries; number of registered female offspring includes all ages from weanling to mature female offspring, so many will not be of age for inspection; inspected mares indicates only those mares which have been entered and/or presented at a keuring and graded into the appropriate level of mare book; statistics for 'two year license expired' stallions are not included. Due to space limitations, stallions whose numbers are unchanged from 2004/2005 are not necessarily included in this list.

Inspection Premium scores are separated: 7.0 - 7.49 & 7.5 and above

Stallion	Registration Number	# Offspring	Licensed Stallion	Reg. Females	Inspected Mares					Premiums
